

Beehive Lip Balm Recipe

Ingredients:

Makes 10 x 15g pots of lip balm

- 75g Coconut Oil
- 75g Olive Oil
- 37.5 g Honey
- 37.5 g Beeswax

Instructions:

1. Measure out each ingredient, and mix the oils and honey together in a bowl. It can be a good idea to measure out a wee bit extra of each, as a small amount of mixture is usually lost in pouring at the end
2. Place the bowl with the oils and honey in over a pan with boiling water in it. This is called a ban marie, or a double boiler.
3. Allow the oils and honey to melt, and mix together, without getting too hot. Then add the beeswax and allow this to melt too.
4. Once the wax has completely melted, take the bowl off the heat and begin to whisk the mixture quickly.
5. As it begins to cool, the mixture will start to solidify and you should see some around the edges begin to harden. As soon as you see this, pour the remaining mixture into the small jars.
6. Allow it to cool completely without moving them
7. Enjoy your new homemade lip balm or give it to a friend!
